I LOVE MONDAYS

Monday

On Monday, go to office hours and ask questions on the proofs of $\text{proj}(\vec{v}+\vec{u})$ & other things

Elementary Probability Assignment 3 due

This week is the last week to be free before all the midterms & Finals, I will try & update all audio recordings and then put all Solutions & Assignments on my webpage. I will have to back down on my website maintenance and buckup on my handwritten notes.

Some books/topics to borrow

- Lie Algebras
- Accesible web dev
- Chaos theory
- Azure devops,
- Git
- Machine learning Libraries.

Tuesday

Download all of the other Youtube videos & place it on my channel.

October 1 2019

Do E(X) and Var(X) proofs for discrete and continuous distributions & try to complete :llwps. Get the :llwps for the proofs of elementary mathematics theorems, especially real analysis & linear algebra. linear Algebra { Sample · Template for :llwps.

Wednesday

Remember to put all of these schedules on Wikimedia & put it in Schedule & Acad.

This is the only day in which I can get to ask all profs about midterm content.

Prepare for the classes by reading, ensure by asking which specific sections for the midterms will be tested. The :llwps is a great thing for reference.

Assignment 4 Mastering Physics Due 10pm

Thursday

The most important thing this Thursday is Ensure all things are Ready and that notes are ready, remember practice, practice and practice alot.

I wish professors will come back on Saturdays and Sundays and hold full day office hours, please

I wish profs come back on Sat & Sun 24/7.

Whole week

I Love MONDAYS

Fridays

Ensure all things are Ready, remember practice, and practice alot.

The most important thing this Thursday is labs, prepare for fprintf & sprintf functions, look at course archives and ensure that all things are ready.
