

b.pdf

Note: Third-party hosted sites usually treat my content as SPAM [which of course it's not]. The basis of this is that they are run on HDD servers and don't want to be a content delivery network (CDN).

The Topological Group is the project that wishes to document the beauty of mathematics. It encompasses third-party servers such as WordPress, Imgur and GitHub... Meaning these sites can be banned, restricted and so on. Details for each group are shown below.

Image will show the group logo and some descriptions on what it means. blab, blab, blab.

The topological group is mainly a documentation of my life, it has many different websites and I try to keep all my content consistent in between each and every site.

You wonder why people don't answer emails on Saturday & Sunday?

The topological group in specific {fair 2018} is a feeder group. It will contain almost all material on the group and this group is part of a manifold. Talk about Archiving -> locking Archiving -> 2FA Phone.

Meeting with Raymond

- To show NEW checklist
- To show my Transcript
- Summer date add/drop

w to set up and blah blah		Meeting with Susan	
newark Assignments due (To do list) [Done on Monday 27 January 11:19 pm]		February Begins (Print 20 copies)	
Differential Equations	Complex Analysis	Economics (ECON 1010)	1) Pens ready (schedules)
weassign 2	1) Assignment 2	1) Quiz 1 & 2	2) Milk ready
Practice Problem 2	2) LABS this week	2) Quiz	3) Paper ready (11x17, July)
Test NEXT MON	Questions: mmmweng.info.yorku.ca Robots.txt	3) ECON 1010 Practice Test	4) EXAM Schedule is READY (A)

$$x(t) = \tan\left(\theta t - \frac{3\pi}{8}\right)$$

The Gauss law and Maxwell Equations are ready
