

# Meeting with ins Monday 6

- Find out the order of chapters you should read, and then try to read the chapters before the lectures.

when you listen to a lecture for the first time, it hard to process and learn the material on the spot if it is new material, read the chapter before so I can learn & understand it, so when I listen to the lecture I can build on my knowledge

$$p(t) = \left( \frac{b}{a} + (e^{-at}) - 1 \right)$$

$$M_y = -\frac{(4x^2y + 4xy^2)}{(x+y)^3} + Ce^{-t(t-1)}$$

$$y-b = x + \frac{1}{b} + Ce^{bx} \quad (-\infty, \infty) \quad e^{-t(t-1)}$$

$$y = \tan(x+c) - x - 8$$

- Print out ~~all~~ of my Syabulli, write in my calender all Assignment & test dates for each class in a different colour so you can see which class.

For example, if you have several different things due for a week. You know I should do it a couple of weeks before, you also be able to see what courses I need to work on for reading week & what courses I need to work on after reading week.

Tell Stephanie why I need a Calculator

You can know the material very well but your very Stress and anxious during the exam, it could impact your memory or your ability to remember what you learned.

$$\frac{dy}{y^2} = \sin(x^2) dx$$

$$\int_0^1 \frac{1}{y^2} dy = \int \sin(x^2) dx$$

$$-\frac{1}{y} \Big|_0^1$$

- Find a Friday [Easy Day] and go to the library & find a quiet spot and do my readings.

Moleskin 2020 weekly

Planner  $X(6-7)^2 - 5 = -x - 5$

$$y = \left[ 3 - \int_x^2 \sin t^2 dt \right]$$

Meeting Susy (December 2019)

Nov 21: 4:30 pm  
Nov 21: 11:30 am

Dec 6:  
Dec 9: 9:30 am  
Dec 16: 9:30 am  
Dec 20: 9:30 am

9.2.2.030

9.2.2.030
