

Meeting with ins Monday 6

① Find out the order of chapters you should Read, and then try to read the chapters before the lectures.

9.2.2.030

When you listen to a lecture for the first time, it hard to process and learn the material on the spot if it is new material, read the chapter before so I can learn & understand it, so when I listen to the lecture I can build on my knowledge

② Print out ^{all} of my Syabulli, write in my calendar all Assignment & test dates for each class in a different colour so you can see which class.

2.4 011

For example, if you have several different things due for a week. You know I should do it a couple of weeks before, you also be able to see what courses I need to work on for reading week & what courses I need to work on after reading week.

Tell Stephanie why I need a Calculator

You can know the material very well but you very stress and anxious during the exam, it could impact your memory or your ability to remember what you learned.

$$3x^2 - 2 + \frac{5}{x} = 6 \quad 2x + \frac{5}{x} = 6$$

Find a Friday [Easy Day] and go to the library
& find a quiet spot and do my readings.

Moleskin 2020 weekly

Planner $\frac{5-x}{2} = 5 - \frac{1}{2}(1-9)x$

$$L[3x^2 + 5x^2 - x] = 6 \quad (1012 \text{ Dec 12 Dec 12}) \text{ Asns Meeting}$$

$$p(t) = \left(\frac{b}{a} + (e^{-at}) - 1 \right)$$

$$y'' = \frac{(4x^2y + 4xy^2)}{(x+y)^4} + Ce^{-t(t-1)}$$

$$y - 6 = x + \frac{1}{8} + Ce^{6x} \quad (-\infty, \infty) \quad e^{-t(t-1)}$$

$$y = \tan(x+C) - x - 8$$

$$\frac{1}{2} \int_0^{\frac{\pi}{2}} \sin(x^2) dx = \int_0^{\frac{\pi}{2}} \sin(x^2) dx$$

Dec 20: 12:20

Dec 16: 12:20

Dec 9: 12:20

Nov 30: 11:12 Nov

Nov 20: 12:20

Nov 12: 12:20
