

05000

the proofs of Elementary Probability
proj ($\vec{v} + \vec{u}$) Assignment 3 due

& other things

- Lie Algebras
- Chaos theory
- Azure devops

• Maschine leistung

~~Some books topics to borrow~~

This week is the last week to be free before all the midterms & Finals, I will try & update all audio recordings and then put all solutions & Assignments on my webpage. I will have to back down on my website maintenance and back up on my handwritten notes.

with protesters
on Saturdays full
and hold hands
hours please
and

I wish professors will come
to the office on Saturdays and Sundays

SATCNOV

(whole week)

Friday

back Ensure all things are ready, remember practice and practice alot.

Remember to put
all at these schedules on
Wikipedia & put it
in Schedule & Acad

The most important thing this ^{week} Thursday is
lab, prepare for final & sprint & finish
look at course archives and ensure that

Prepare for the classes by reading / ensure by asking which specific sections for the midterms study is will be tested. The 11/11/11 is a functions, great thing for reference.

Assignment 4 Mastering
Physics Due 10PM

Download all of the other
Youtube videos & place it on
my channel.

~~October | 2019~~

~~Do ECK and continuous distributions for the discrete jumps. Get the parameters.~~

~~discrete jumps. Get the parameters.~~

~~continuous distributions for the discrete jumps.~~

~~Sample~~

~~. Template~~

~~-llwps~~

• Template for
= 11 wps.

This is the only day in which I
can get to ask all profs about
midterm content.

Wish Profs
Come back on
Sat & Sun
