

Meeting with ins Monday 6

① Find out the order of chapters you should Read, and then try to read the chapters before the lectures.

when you listen to a lecture for the first time, it hard to process and learn the material on the Spot if it is new material, read the chapter before so I can learn & understand it, so when I listen to the lecture I can build on my knowledge

$$p(t) = \left(\frac{b}{a} + (e^{-at}) - 1 \right)$$

$$M_y = \frac{-(4x^2y + 4xy^2)}{(x+iy)^2} + Ce^{-t(t-1)}$$

$$y-b = x + \frac{1}{b} + Ce^{bx} \quad (-\infty, \infty) \quad e^{-t(t-1)}$$

$$y = \tan(x+c) - x - 8$$

9.2.2.030

② Print out all of my Syabulli, write in my calender all Assignment & test dates for each class in a different colour so you can see which class.

For example, if you have several different things due for a week. You know I should do it a couple of weeks before, you also be able to see what courses I need to work on for reading week & what courses I need to work on after reading week.

Tell Stephanie why I need a Calculator

You can know the material very well but your very Stress and anxious during the exam, it could impact your memory or your ability to remember what you learned.

$$\frac{dy}{y^2} = \sin(x^2)dx$$

$$\int \frac{1}{y^2} dy = \int \sin(x^2) dx$$

$$-\frac{1}{y} = \frac{1}{2} -$$

~~$$y = \frac{1}{x} + e^{-x+c}$$~~

$$y = \frac{1}{x} + e^{-x+c}$$

• Find a Friday [Easy Day] and go to the library & find a quiet spot and do my readings.

• Moleisk in 2020 weekly

Planner $X(6-7)^2 - 5 = -x - 5$

$$y = \left[3 - \int_x^2 \sin t^2 dt \right]$$

$$\frac{dp}{dy} = x(y-7)^2 - 5$$

Nov 21 : 4:30pm
Nov 21 : 11:30am

Meeting Susy (December 2019)

Dec 6:
Dec 9: 9:30am
Dec 16: 9:30am
Dec 20: 9:30am
