The lecture recording was not recorded as some weird person called me and thus the recording on the phone was cancelled and only 2 minutes was captured

ALL BOOKS MUST BE GIVEN TO CLAUDIO

Meet Professor Hyde on February 7 2020  
A little comment

Prepare all questions to ask her.

$$\frac{dy}{dx} = \frac{2u}{x}$$

$$x \sin y + \cos x - y^2 = 0$$

$$\frac{dy}{dx} = \frac{x \cos y + \cos x}{x \sin y - 2u}$$

$$\frac{dy}{dx} = \frac{\log x}{x}$$

$$x \sin y + \cos x + cx = 0$$

$$\frac{dy}{dx} = \frac{1}{x}$$
