

Meeting with ins Monday 6

- ① Find out the order of chapters you should read, and then try to read the chapters before the lectures.

When you listen to a lecture for the first time, it's hard to process and learn the material on the spot if it is new material, read the chapter before so I can learn & understand it, so when I listen to the lecture I can build on my knowledge

- ② Print out ^{all} of my Syabulli, write in my calendar all assignment & test dates for each class in a different colour so you can see which class.

For example, if you have several different things due for a week. You know I should do it a couple of weeks before, you also be able to see what courses I need to work on for reading week & what courses I need to work on after reading week.

Tell Stephanie why I need a calculator:

You can know the material very well but you're very stressed and anxious during the exam, it could impact your memory or your ability to remember what you learned.

$$y = \frac{5}{t} + Ce^{-t}$$

- Find a Friday [Easy Day] and go to the library & find a quiet spot and do my readings.

Moleskine 2020 weekly

$$\text{Planner } \overline{s-x} = s - (l-g)x$$

$$L \left[\frac{x^2 + u^2}{x} \int -\varepsilon \right] = h$$

Meeting susy (December 2019) - buying bus
