

## Meeting with Raymond

Email the Professor ahead of time and ask him so that I can sit in and ~~have~~ Wordpress.com Account he might be open to it.

Email Raymond my Pre-Schedule for the week on Sunday

The proceeding week was a bad week. Went to an MATL lab (hosted by graduate students) to ask some questions. If they cannot answer the questions then how am I an undergraduate is expected to answer these questions?

## apple Problem

Google BANNED! (well officially the term is blocked) me from accessing /jair2018 maybe due to me putting links of -mlcv-.mp4 files on their platform.

There are 15 MCQ (Avi-Cohen) but these MCQs also contain short(very-shaft) questions that are NOT MCQs. They are usually directly taken from the flex Text but he also adds some flare to the questions. Hopefully he will not add too much to the mid-terms & the finals.

89/10

FACTS	90% (100%)	MYTH
People usually get 80% on the quizzes and get a D grade.	real-long time	Avi-Cohen does <del>not</del> have time to see him, he only allows 3 questions during his office hours.

10/10

Reading week  
 weeks before period  
 reading week  
 marks, grades and what not after reading week  
 and content retention  
 before reading week  
 is an economic problem.

10/10

This is a classical joke that I find funny as well prof in general economic professors who DO NOT have office hour had purposefully used their statistics to not have more work, just wanna teach & not bell curve. (LOL)
